# SUMMARY CARE RECORD

## What is the NHS Summary Care Record?

The NHS Summary Care Record (SCR) contains vital information about your health needs and medical history and can be securely accessed by staff involved with your care that don't have full access to the comprehensive medical records held at your GP practice, e.g. A&E or Out Of Hours services. The information contained within it will be solely used to provide more effective, safer, and timelier decisions about your care, particularly when you are unwell or if you have complex conditions or care needs. Only authorised staff can view your SCR, they will ask your permission at the time (unless you are unconscious or if it is an emergency, in which case they may look without your permission), and it allows those who do not know your medical history in different organisations to provide you with optimum treatment. For more information call 0300 303 5678 or visit <https://digital.nhs.uk/summary-care-records>.

## Your Summary Care Record Choice

You have the choice of what information you would like to share within your SCR. You will already have an SCR if you are registered with a GP practice in England, unless you have previously opted out. You are free to change your decision at any time by informing your GP practice, and if you chose to not express a preference below, a core SCR will be automatically created for you.

**Tick ONE BOX below** which corresponds to your choice, and **SIGN below.**  
**Your choice is not valid without a signature:**

**Opt In to Core SCR** (admin 9Ndm)  
The SCR will contain info about your medication, your allergies, and any adverse reactions.

**Opt In to Core SCR (with additional info)** (admin 9Ndn)  
The SCR will contain info about your medication, your allergies, and any adverse reactions. *It will also contain* your illnesses and health problems, any major operations you have ever had, your vaccination history, any extra support you might need (e.g. dietary requirements), and any religious beliefs, or important legal decisions or contact details. *It will not include* sensitive information related to fertility treatments, sexually transmitted infections, pregnancy terminations or gender reassignment.

**Opt Out of SCR** (admin 9Ndo)  
No extra data will be shared with other healthcare professionals involved in your care.

## NATIONAL DATA OPT-OUT

NHS Digital can use confidential information about your health and care to help improve your individual care, speed up diagnosis, plan your local services and research new treatments. Your confidential patient information can be used by the NHS, local authorities, university and hospital researchers, medical colleges, and pharmaceutical companies researching new treatments. It will not be used for marketing or insurance purposes. There are strict rules on how data can and cannot be used, and wherever possible, your data will be used in a way that does not identify you. You do not need to do anything if you are happy with your information being used. For further information, visit <https://digital.nhs.uk/services/national-data-opt-out> and <http://www.nhs.uk/your-nhs-data-matters/>

You can check your current opt-in or opt-out status at the website below. If you wish to opt-out of sharing your confidential information as outlined above, this will not affect your own personal care or treatment in any way. You can do this by calling 0300 303 5678 or visiting <https://your-data-matters.service.nhs.uk/>
